President's Advisory Panel on Federal Tax Reform
1440 New York Avenue NW Suite 2100
Washington, DC 20220

Dated: March 14, 2005

Dear Advisory Panel Members:

I have asked the IRS several times how to figure out if I owe any income taxes, but they refuse to give my straight answers.

I asked the IRS who should use 861 and its regs to determine their taxable income where the law says who should use them.

I asked if 861 and its regs show the income of the average American to be taxable.

I asked how to determine if the "items" of income one receives are taxable or not.

And, I even asked what is the purpose of the list of non-exempt income in 1.861-8T(d)(2)(iii), and why the income of the average American is not on the list.

I want to know which income is exempted by the Constitution itself (though not by any statute).

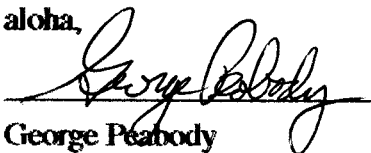

Again, if I can't answer those question, it is IMPOSSIBLE to determine my "taxable income," and therefore impossible to determine what I owe.

Now I feel betrayed, for the past 45 years of my working life, being rippedoff by the IRS criminals.

Also, I have learned that the Federal Reserve is not part of the US federal government! It was an admission by President Reagan's Grace Commission, that none of the income taxes collected by IRS goes to pay for any federal government services. Those taxes are paying interest to these foreign banks.

The IRS must be abolished, now! NO ANSWERS, NO TAXES !

aloha,

George Peabody
